ABOUT ME

I do programming with a lot of passion having a strong emphasis on open source softwares. I have been using exclusively GNU/Linux for more than 20 years and feel very comfortable on the command line. I'm always seeking new challenges to improve my skills and learn something new. Job done in the "state of the art" within a team of motivated and skilled developers provides me the greatest satisfaction. I can coordinate the tasks of few people but I prefer to concentrate on the technical aspects.

WORK EXPERIENCE

02.2019 - present — **SCEWO AG, Winterthru (CH)**
Stair climbing electric wheelchairs (Linux)

02.2017 - 06.2018 — **Comet PCT, Flamatt (CH)**
High frequency generators (Linux)
